## 🪪 PROFILE

PROFILE
As 5th-year student of game development and computer engineering, I have created a variety of game projects that showcase my skills in programming, game design, and creativity. From simple puzzle games to complex RPGs, I have used a range of game engines and programming languages to develop my projects. In addition to my game projects, I have also included design documents and game assets to provide insight into my design process and artistic abilities

## 🎓 INTERNSHIPS

| | |
|---|---|
| August 2022 – September 2022 | **Developer at E-Surveys**<br>I developed an optimized web application that allows users to securely store and manage their data in the maritime domain using Angular, Ionic, and NodeJS. |
| July 2023 – September 2023 | **Developer at ContyFind**<br>I redeveloped a web application for streamlined management of maritime data using Angular, Ionic, and NodeJS. This enhancement optimizes user experience, ensuring a seamless and secure platform for simplified storage and management of sensitive data. |
